Foreword	xxii
Preface	xxiii
Contributors	xxiv
1. Foot and Ankle Anatomy	1
<i>Jie Chen, Natalie R. Black, Randal Morris, and Vinod K. Panchbhavi</i>	
1.1 Ankle	1
1.1.1 Arthrology	1
1.1.2 Ligaments	1
1.2 Hindfoot	3
1.2.1 Osteology	3
1.2.2 Arthrology	4
1.3 Midfoot	5
1.3.1 Osteology	5
1.4 Forefoot	6
1.4.1 Osteology	6
1.5 Muscle Anatomy	7
1.5.1 Leg Compartments	7
1.5.2 Layers of the Foot	10
1.5.3 Neural Anatomy	11
1.5.4 Vascular Anatomy	12
1.6 Key Testing Facts	13
References	13
2. Surgical Approaches to the Foot and Ankle	14
<i>Natalie V. Singer and David M. Walton</i>	
2.1 Ankle Approaches	14
2.2 Foot Approaches	21
2.3 Key Testing Facts	30
References	30
3. Biomechanics of the Foot and Ankle	31
<i>Benjamin B. Lindsey, Fred T. Finney, and Todd A. Irwin</i>	
3.1 Introduction	31
3.2 The Ankle Joint	31
3.2.1 Anatomy	31
3.2.2 Kinematics of the Ankle Joint	31
3.2.3 The Distal Tibiofibular Articulatio n (Syndesmosis)	32
3.3 The Hindfoot	33
3.3.1 Anatomy and Kinematics	33

Contents

3.3.2	Relationship of the Subtalar and Transverse Tarsal Joints	34	3.6	The Gait Cycle.	36
3.4	The Midfoot	34	3.6.1	Definition of the Gait Cycle	36
3.4.1	Anatomy	34	3.6.2	Stance Phase	37
3.4.2	Function and Three-Column Theory	35	3.6.3	Swing Phase	39
3.5	The Forefoot and Windlass Mechanism.	35	3.6.4	Gait Changes with Running	39
3.5.1	Anatomy and Kinematics	35	3.6.5	Gait Disorders	39
3.5.2	The Foot as a Tripod	36	3.7	Key Testing Facts	41
4.	History and Physical Examination	42		References	41
	<i>Adam D. Bitterman</i>				
4.1	History and Physical Examination	42	4.2.7	Syndesmosis	47
4.1.1	Introduction	42	4.2.8	Subtalar Joint and Midfoot Joints	47
4.1.2	History	42	4.2.9	Metatarsophalangeal Joint	48
4.1.3	Additional Components	43	4.2.10	Forefoot	48
4.2	Physical Examination	43	4.2.11	Tendons	48
4.2.1	Introduction	43	4.2.12	Gait Evaluation	49
4.2.2	Inspection	43	4.2.13	Shoe and Orthotic Evaluation	49
4.2.3	Standing Examination	44	4.3	Key Testing Facts	49
4.2.4	Seated Examination	44		References	50
4.2.5	Testing	47			
4.2.6	Ankle Joint	47			
5.	Imaging	51			
	<i>Craig Chike Akoh and Phinit Phisitkul</i>				
5.1	Purpose of Imaging	51	5.2.3	Weight-Bearing Films	52
5.1.1	Indications	51	5.2.4	Stress Radiographs	55
5.2	Plain Radiographs	51	5.3	Ultrasound	55
5.2.1	Basic Principles	51	5.3.1	Basic Principles	55
5.2.2	Standard Imaging Protocol	52	5.3.2	Dynamic Evaluation	55
			5.3.3	Achilles Tendon Rupture	56
			5.3.4	Therapeutic Injections	56

5.4	Computer Tomography Scan	56	5.6	Nuclear Medicine Scanning	59
5.4.1	Basic Principles	56	5.6.1	Technetium-99 Bone Scan	59
5.4.2	Innovations	56	5.6.2	Single-Photon Emission CT Scan	59
5.4.3	Weight-Bearing Computed Tomography	57	5.6.3	Tagged White Blood Cell Scan	61
5.5	Magnetic Resonance Imaging	57	5.7	Key Testing Facts	61
5.5.1	Basic Principles	57	References	62	
5.5.2	Tissue-Specific Imaging	58			
6.	Disorders of the First Ray	64			
	<i>Phillip T. Kirm, Samuel AbuMoussa, and Christopher E. Gross</i>				
6.1	Hallux Valgus	64	6.3.4	Diagnostics	69
6.1.1	Etiology	64	6.3.5	Classification	69
6.1.2	Pathophysiology	64	6.3.6	Conservative Management	69
6.1.3	Symptoms	64	6.3.7	Surgical Intervention	70
6.1.4	Diagnostics	64	6.4	Sesamoid Pain	71
6.1.5	Classification	65	6.4.1	Etiology	71
6.1.6	Conservative Management	65	6.4.2	Pathophysiology	72
6.1.7	Surgical Intervention	65	6.4.3	Symptoms	72
6.1.8	Akin Procedure (Proximal Phalanx Osteotomy)	65	6.4.4	Diagnostics	73
6.1.9	Chevron Procedure (Distal Metatarsal Osteotomy)	66	6.4.5	Conservative Management	73
6.1.10	Postoperative Care	68	6.4.6	Surgical Intervention	73
6.2	Hallux Varus	68	6.5	Turf Toe	73
6.2.1	Etiology	68	6.5.1	Etiology	73
6.2.2	Pathophysiology	68	6.5.2	Pathophysiology	74
6.2.3	Symptoms	68	6.5.3	Symptoms	74
6.2.4	Diagnostics	68	6.5.4	Diagnostics	74
6.2.5	Conservative Management	68	6.5.5	Classification	74
6.2.6	Surgical Intervention	68	6.5.6	Conservative Management	74
6.3	Hallux Rigidus	69	6.5.7	Surgical Intervention	74
6.3.1	Etiology	69	6.5.8	Rehabilitation	74
6.3.2	Pathophysiology	69	References	75	
6.3.3	Symptoms	69			

Contents

7.	Lesser Toe Deformities	76		
	<i>Justin Tsai and Steven M. Raikin</i>			
7.1	Anatomy	76	7.4.1	Etiology and Pathophysiology
7.1.1	Flexor Mechanism	76	7.4.2	Symptoms/Physical Examination
7.1.2	Intrinsic Muscles	76	7.4.3	Diagnostics and Classification
7.1.3	Plantar Plate	76	7.4.4	Nonoperative Management
7.1.4	Collateral Ligaments	77	7.4.5	Operative Management
7.2	Mallet Toe	78	7.5	Bunionette
7.2.1	Etiology and Pathophysiology	78	7.5.1	Etiology and Pathophysiology
7.2.2	Symptoms/Physical Examination	78	7.5.2	Symptoms/Physical Examination
7.2.3	Diagnostics and Classification	79	7.5.3	Diagnostics and Classification
7.2.4	Nonoperative Management	79	7.5.4	Nonoperative Treatment
7.2.5	Operative Management	79	7.5.5	Operative Management
7.3	Hammer and Claw Toes	80	7.6	Freiberg's Infraction
7.3.1	Etiology and Pathophysiology	80	7.6.1	Etiology and Pathophysiology
7.3.2	Symptoms/Physical Examination	80	7.6.2	Symptoms/Physical Examination
7.3.3	Diagnostics and Classification	81	7.6.3	Diagnostics and Classification
7.3.4	Nonoperative Management	81	7.6.4	Nonoperative Management
7.3.5	Operative Management	81	7.6.5	Operative Management
7.4	Lesser Joint MTP Instability/Plantar Plate	82	7.7	Key Testing Facts
				References
				90
8.	Sesamoids and Accessory Bones of the Foot	91		
	<i>Katherine Gavin and Adam D. Bitterman</i>			
8.1	Sesamoids	91	8.1.4	Pathologic Conditions, Including Treatment and Surgical Approaches
8.1.1	Anatomy and Function	91	8.1.5	Surgical Approaches
8.1.2	Clinical Examination	92		
8.1.3	Imaging	92		

8.1.6	Postoperative Care, Results, and Complications	96	8.2.6	Os Calcaneus Secundarius	100
8.2	Accessory Bones of the Foot	97	8.2.7	Os Vesalianum	100
8.2.1	Os Trigonum	97	8.2.8	Additional Rare Accessory Bones	101
8.2.2	Accessory Navicular	98	8.3	Key Testing Facts	101
8.2.3	Os Peroneum	99		References	101
8.2.4	Os Subtibiale	99			
8.2.5	Os Subfibulare	100			
9.	Flatfoot Deformity	103			
	<i>Johnny L. Lin and Christopher E. Gross</i>				
9.1	Etiology and Pathophysiology	103	9.6	Treatment	108
9.1.1	Anatomy	103	9.7	Conservative Management	108
9.1.2	Etiology	104	9.8	Surgical Intervention	108
9.1.3	Pediatric Pes Planus	104	9.9	Rehabilitation	110
9.2	Symptoms	105	9.10	Key Testing Facts	110
9.3	Physical Examination	105		References	111
9.4	Imaging	106			
9.5	Classification	107			
10.	Pes Cavus	112			
	<i>Thomas I. Sherman and Gregory P. Guyton</i>				
10.1	Introduction	112	10.4	Diagnostics and Classification	117
10.2	Etiology and Pathophysiology	112	10.4.1	Radiographs	117
10.2.1	Neuromuscular Causes	113	10.4.2	Computed Tomography	120
10.2.2	Congenital Causes	115	10.4.3	Magnetic Resonance Imaging	120
10.2.3	Traumatic Causes	115	10.5	Conservative Management	121
10.2.4	Idiopathic Causes	116	10.5.1	Orthotics	121
10.3	Symptoms	116	10.5.2	Orthoses	121
10.3.1	History	116			
10.3.2	Physical Examination	117			

Contents

10.6	Surgical Intervention	121	10.6.3	Bony Procedures	123
10.6.1	Forefoot Corrective Procedures	121	10.7	Key Testing Facts	124
10.6.2	Soft-Tissue Procedures and Tendon Transfers	122		References	124
11.	Heel Pain	127			
	<i>Austin R. Davidson and Clayton C. Bettin</i>				
11.1	Introduction	127	11.6	Tarsal Tunnel Syndrome	133
11.2	Plantar Fasciitis	127	11.7	Complex Regional Pain Syndrome	134
11.3	Fat Pad Atrophy/Contusion	129	11.8	Tumor	135
11.4	Calcaneal Stress Fracture	130	11.9	Key Testing Facts	135
11.5	Entrapment of the First Branch of the Lateral Plantar Nerve (Baxter's Nerve)	131		References	136
12.	Hallux Rigidus: Osteoarthritis of the First Metatarsophalangeal Joint	138			
	<i>Thomas B. Bemenderfer and Kent Ellington</i>				
12.1	History	138	12.6	Diagnosis and Classification	140
12.2	Pathophysiology	138	12.7	Imaging	140
12.3	Natural History	139	12.8	Management	140
12.4	Etiology	139	12.9	Outcomes	142
12.5	Symptoms	139	12.10	Key Testing Facts	143
12.5.1	Physical Examination	140		References	145
13.	Ankle Arthritis	147			
	<i>Derrick Foge, Joseph Chavarria, and Kenneth J. Hunt</i>				
13.1	The Problem of Arthritis	147	13.2	Etiology and Pathophysiology	147

13.3	Symptoms and Physical Examination	148	13.6	Surgical Intervention	149
13.4	Diagnostics and Classification	148	13.7	Rehabilitation	153
13.5	Conservative Management	149	13.8	Key Testing Facts	153
				References	153
14.	Disorders of the Tendons	155			
	<i>Gonzalo F. Bastias and Lew C. Schon</i>				
14.1	Achilles Tendon	155	14.3.1	Anatomy	170
14.1.1	Anatomy	155	14.3.2	Anterior Tibial Tendinopathy	170
14.1.2	Etiology and Risk Factors	155	14.3.3	Anterior Tibial Tendon Rupture	170
14.1.3	Noninsertional Achilles Tendinopathy	156	14.4	Flexor Tendons	172
14.1.4	Insertional Achilles Tendinopathy	158	14.4.1	Flexor Hallucis Longus	172
14.1.5	Retrolcalcaneal Bursitis	160	14.4.2	Flexor Digitorum Longus	174
14.1.6	Acute Achilles Tendon Rupture	160	14.5	Extensor Tendons	174
14.1.7	Chronic Achilles Tendon Rupture	162	14.5.1	Extensor Digitorum Longus	174
14.2	Peroneal Tendons	164	14.5.2	Extensor Hallucis Longus	175
14.2.1	Anatomy	164	14.6	Posterior Tibial Tendon	175
14.2.2	History and Physical Examination	165	14.6.1	Subluxation Dislocation	175
14.2.3	Peroneal Tenosynovitis/ Tendonitis	166	14.7	Key Testing Facts	176
14.2.4	Peroneal Tendon Instability	167		References	179
14.2.5	Peroneus Brevis Tears	168			
14.2.6	Peroneus Longus Tears	169			
14.2.7	Combined Peroneal Tears	169			
14.3	Anterior Tibial Tendon	170			
15.	Athletic Injuries of the Foot and Ankle	181			
	<i>Brian C. Lau and Annunziato Amendola</i>				
15.1	Overview	181	15.2	Ankle Fracture in Athletes	181

Contents

15.3	Turf Toe	182	15.8	Base of the Fifth Metatarsal Fractures	189
15.4	Ankle Instability (Low Ankle Sprain)	185	15.9	Stress Fractures of the Navicular.	190
15.5	Syndesmotic Injury (High Ankle Sprain)	186	15.10	Lisfranc Injuries	192
15.6	Achilles Ruptures	187	15.11	Key Testing Facts	193
15.7	Metatarsal Fractures	188		References	194
16.	Arthroscopy	195			
	<i>Augustine M. Saiz Jr., Christopher D. Kreulen, and Eric Giza</i>				
16.1	Introduction	195	16.4	Subtalar Arthroscopy.	203
16.2	Anterior Ankle Arthroscopy	195	16.5	Key Testing Facts	205
16.3	Posterior Ankle Arthroscopy	200		References	206
17.	Neurologic Disorders	207			
	<i>Emily C. Vafek, Christopher E. Gross, and Simon Lee</i>				
17.1	Interdigital Neuroma (Morton's Neuroma)	207	17.3	Tarsal Tunnel Syndrome	210
17.1.1	Etiology and Pathophysiology	207	17.3.1	Etiology and Pathophysiology	210
17.1.2	Symptoms.	207	17.3.2	Symptoms.	210
17.1.3	Diagnostics.	208	17.3.3	Diagnostics.	210
17.1.4	Conservative Management	208	17.3.4	Conservative Management	210
17.1.5	Surgical Intervention.	208	17.3.5	Surgical Intervention.	211
17.2	Recurrent Interdigital Neuroma.	209	17.4	Lateral Plantar Nerve Entrapment (Baxter's Neuropathy).	211
17.2.1	Etiology and Pathophysiology	209	17.4.1	Etiology and Pathophysiology	211
17.2.2	Symptoms.	209	17.4.2	Symptoms.	211
17.2.3	Diagnostics.	209	17.4.3	Diagnostics.	211
17.2.4	Conservative Management	209	17.4.4	Conservative Management	211
17.2.5	Surgical Intervention.	209	17.4.5	Surgical Intervention.	212

17.5	Medial Plantar Nerve Entrapment (Jogger's foot)	212	17.5.1	Etiology and Pathophysiology	212	17.5.2	Symptoms	212	17.5.3	Diagnostics	212	17.5.4	Conservative Management	212	17.5.5	Surgical Intervention	212	17.7.1	Etiology and Pathophysiology	214	17.7.2	Symptoms	214	17.7.3	Diagnostics	214	17.7.4	Conservative Management	214	17.7.5	Surgical Intervention	215			
17.6	Anterior Tarsal Tunnel Syndrome	213	17.6.1	Etiology and Pathophysiology	213	17.6.2	Symptoms	213	17.6.3	Diagnostics	213	17.6.4	Conservative Management	213	17.6.5	Surgical Intervention	214	17.8	Sural and Saphenous Nerve Entrapment	215	17.8.1	Etiology and Pathophysiology	215	17.8.2	Symptoms	215	17.8.3	Diagnostics	215	17.8.4	Conservative Management	216	17.8.5	Surgical Intervention	216
17.7	Superficial Peroneal Nerve Entrapment	214	17.9	Key Testing Facts	216	References	217																																						
18.	Diabetes and Charcot	218																																											
	<i>D. Anthony Barcel and Carroll P. Jones</i>																																												
18.1	Introduction	218	18.4.3	Additional Tests	221	18.4.4	Classification	221	18.5	Conservative Management	223	18.5.1	Eichenholtz Stage 0	223	18.5.2	Eichenholtz Stage I	223	18.5.3	Eichenholtz Stages II and III	223	18.6	Surgical Intervention	224	18.6.1	General Principles	224	18.6.2	Surgical Principles	224	18.6.3	Postoperative Care	227					
18.2	Etiology and Pathophysiology	218	18.2.1	Pathophysiology	218																																							
18.3	Clinical Presentation	219	18.3.1	History	219	18.3.2	Physical Examination	220																																			
18.4	Diagnostics and Classification	220	18.4.1	Diagnosis	220	18.4.2	Imaging	221																																			

Contents

18.7	Rehabilitation	227	References	228
18.8	Key Testing Facts	228		
19.	Foot and Ankle Amputations	230		
	<i>Michael S. Pinzur and Adam P. Schiff</i>			
19.1	Terminal Organ of Weight Bearing	230	19.4.3	Ray Resection 234
			19.4.4	Midfoot Amputation 234
			19.4.5	Hindfoot Amputation 235
19.2	Initial Wound Management	230	19.4.6	Syme's Ankle Disarticulation 236
			19.4.7	Transtibial (Below-Knee) Amputation 237
19.3	Determination of Amputation Levels	230	19.5	Conclusions 237
19.4	Successful Amputation Levels	231	19.6	Key Testing Facts 238
19.4.1	Hallux Amputation	231	References	239
19.4.2	Lesser Toe Amputation	232		
20.	Foot and Ankle Trauma	240		
	<i>Tobin Eckel, Thomas M. Hearty, and Scott B. Shawen</i>			
20.1	Pilon Fractures	240	20.2.6	Posterior Malleolar Fractures 244
20.1.1	Etiology and Pathophysiology	240	20.2.7	Syndesmosis 245
20.1.2	Symptoms	240	20.2.8	Rehabilitation 246
20.1.3	Diagnostics/Classification	240	20.3	Calcaneal Fractures 246
